

Breather Vent

Technology

Ideal for designs in the commercial vehicle market such as On-Highway, Agricultural, Construction and Recreational applications. Cinch ModICE is manufactured for performance and quality with an emphasis on satisfying the needs of today's rugged sealed connector enclosures.

Benefits

The breather provides an option for applications exposed to thermal or altitude cycling. The membrane vent is designed to equalize the pressure differential between the enclosure and the ambient environment while maintaining the enclosure sealing characteristics.

Membrane Vent Characteristics

Operating Temperature: -40°C to +100°C

Typical Airflow: 600 ml/min @ 70mbar differential pressure

Ingress Protection: IP67

Located under the enclosure, the membrane is protected from direct exposure to pressure wash.

Enclosure SE	Part Number
Without Heat Sink	581 01 30 059
With 1 Heat Sink	581 01 30 058
With 2 Heat Sink	581 01 30 057

Enclosure LE	Part Number
Without Heat Sink	581 01 60 039
With 1 Heat Sink	581 01 60 038
With 2 Heat Sink	581 01 60 037
